Journal of Analytical and Applied Pyrolysis, 23 (1992) 291–292
Elsevier Science Publishers B.V., Amsterdam

Author index

Aly, M.M., see Gaber, M., 57
Attalla, M.I., see Vassallo, A.M., 73

Bergamasco, G., see Cecchetti, W., 165

Catinella, S., see Cecchetti, W., 165
Cecchetti, W.
–, Polloni, R., Bergamasco, G., Seraglia, R., Catinella, S., Cecchinato, F. and Traldi, P.
A new pyrolyzer for laser pyrolysis–gas chromatography/mass spectrometry experiments, 165
Cecchinato, F., see Cecchetti, W., 165
Chen, B.-J., see Zhao, G.-X., 87

Daenens, P., see Van Dam, J., 43
DeLuca, S.J.
–, Sarver, E.W. and Voorhees, K.J.
Direct analysis of bacterial glycerides by Curie-point pyrolysis–mass spectrometry, 1

Font, R., see García, A.N., 99

Gaber, M.
–, and Aly, M.M.
Thermolysis of some thioether derivatives, 57
Galletti, G.C.
–, Ward, R.S. and Pelter, A.
Analysis of 2,6-diaryl-3,7-dioxabicyclo-[3.3.0]-octanes and dibenzylbutyrolactones by pyrolysis–gas chromatography/ mass spectrometry, 135
García, A.N.
–, Font, R. and Marcilla, A.
Kinetic studies of the primary pyrolysis of municipal solid waste in a Pyroprobe 1000, 99
Garg, B.S.
–, Singh, P.K. and Garg, S.K.
Spectral and thermal studies on nickel(II) complexes of acenaphthaquinonemono(4-methylquinolinyl)hydrazone, 63
Garg, S.K., see Garg, B.S., 63
Georgakopoulos, C., see Statheropoulos, M., 15
Gusel'nikov, L.E., see Volkova, V.V., 265

Hasegawa, K., see Shimasaki, C., 217
Helleur, R., see Kelly, J., 153
Hirata, T.
Dilatometry of wood. Part I. Longitudinal dilatometry of wood untreated and treated with ammonium phosphate, 175
Hirata, T.
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245

Jakab, E.
–, Till, F., Székely, T., Kozhabekov, S.S. and Zhubanov, B.A.
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229

Kelly, J.
–, and Helleur, R.
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153
Kozhabekov, S.S., see Jakab, E., 229

Marcilla, A., see García, A.N., 99
Mardanov, R.G., see Zaikin, V.G., 33
Masuku, C.P.
Thermolytic decomposition of coniferyl alcohol, 195
Montaudo, G., see Statheropoulos, M., 15
Muto, Y., see Shimasaki, C., 217

Navale, V.
A study of chemical transformation of glycerol ether lipids to hydrocarbons by flash and hydrous pyrolysis, 121

Pelter, A., see Galletti, G.C., 135
Platé, N.A., see Zaikin, V.G., 33
Polloni, R., see Cecchetti, W., 165

Qian, S.-A., see Zhao, G.-X., 87

Sarver, E.W., see DeLuca, S.J., 1
Seraglia, R., see Cecchetti, W., 165
Shimasaki, C.
–, Muto, Y., Takashima, N., Tsukurimichi, E., Yoshimura, T. and Hasegawa, K.
Pyrolysis of tetraphenyl imidodiphosphate, 217
Singh, P.K., see Garg, B.S., 63
Statheropoulos, M.
–, Georgakopoulos, C. and Montaudo, G.

A method for the interpretation of pyrolysis–mass spectra of polyamides, 15
Székely, T., see Jakab, E., 229

Takashima, N., see Shimasaki, C., 217
Till, F., see Jakab, E., 229
Traldi, P., see Cecchetti, W., 165
Tsukurimichi, E., see Shimasaki, C., 217

Van Dam, J.
–, and Daenens, P.
Evaluation of the thermal decomposition apparatus used for toxicity testing of hydraulic fluids, 43
Vassallo, A.M.
–, and Attalla, M.I.
Studies of thermal transformations of fulvic acids using Fourier transform-infrared emission spectroscopy, 73
Volkova, V.V.
–, Gusel'nikov, L.E. and Zimmermann, G.
Low-temperature matrix-isolation infrared spectroscopy — a method to characterize reactive species from low-pressure pyrolysis of hydrocarbons for mechanistic elucidations, 265
Voorhees, K.J., see DeLuca, S.J., 1

Ward, R.S., see Galletti, G.C., 135

Yakovlev, V.A., see Zaikin, V.G., 33
Yoshimura, T., see Shimasaki, C., 217

Zaikin, V.G.
–, Mardanov, R.G., Yakovlev, V.A. and Platé, N.A.
Composition and microstructure of butadiene–isoprene copolymers from pyrolysis–gas chromatographic/mass spectrometric data, 33
Zhao, G.-X.
–, Chen, B.-J. and Qian, S.-A.
Kinetics of the –C≡N bond transformation into the conjugated $\rangle$C=N– bond in acrylonitrile copolymer using in situ Fourier transform-infrared spectroscopy, 87
Zhubanov, B.A., see Jakab, E., 229
Zimmermann, G., see Volkova, V.V., 265

Journal of Analytical and Applied Pyrolysis, 23 (1992) 293–295
Elsevier Science Publishers B.V., Amsterdam

Subject index

Acenaphthaquinonemono (4-methylquinolinyl)-hydrazone
Spectral and thermal studies on nickel(II) complexes of acenaphthaquinonemono(4-methylquinolinyl)hydrazone, 63
Acrylonitrile copolymer
Kinetics of the –C≡N bond transformation into the conjugated >C=N– bond in acrylonitrile copolymer using in situ Fourier transform-infrared spectroscopy, 87
Ammonium bromide
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245

Bacterial glycerides
Direct analysis of bacterial glycerides by Curie-point pyrolysis–mass spectrometry, 1

–C≡N bond transformation into >C=N– bond
Kinetics of the –C≡N bond transformation into the conjugated >C=N– bond in acrylonitrile copolymer using in situ Fourier transform-infrared spectroscopy, 87
Coniferyl alcohol
Thermolytic decomposition of coniferyl alcohol, 195
Copolymers
Composition and microstructure of butadiene–isoprene copolymers from pyrolysis–gas chromatographic/mass spectrometric data, 33
Curie point
Direct analysis of bacterial glycerides by Curie-point pyrolysis–mass spectrometry, 1

2,6-Diaryl-3,7-dioxabicyclo[3.3.0.]octanes
Analysis of 2,6-diaryl-3,7-dioxabicyclo-[3.3.0]-octanes and dibenzylbutyrolactones by pyrolysis–gas chromatography/mass spectrometry, 135
Dibenzylbutyrolactones
Analysis of 2,6-diaryl-3,7-dioxabicyclo[3.3.0]-octanes and dibenzylbutyrolactones by pyrolysis–gas chromatography/mass spectrometry, 135
Dilatometry
Dilatometry of wood. Part I. Longitudinal dilatometry of wood untreated and treated with ammonium phosphate, 175
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245

Elongation
Dilatometry of wood. Part I. Longitudinal dilatometry of wood untreated and treated with ammonium phosphate, 175

Flash pyrolysis
A study of chemical transformation of glycerol ether lipids to hydrocarbons by flash and hydrous pyrolysis, 121
Fourier transform-infrared
Studies of thermal transformations of fulvic acids using Fourier transform-infrared emission spectroscopy, 73
Fulvic acids
Studies of thermal transformations of fulvic acids using Fourier transform-infrared emission spectroscopy, 73

Gas chromatography
Composition and microstructure of butadiene–isoprene copolymers from pyrolysis–gas chromatographic/mass spectrometric data, 33
Analysis of 2,6-diaryl-3,7-dioxabicyclo[3.3.0]-octanes and dibenzylbutyrolactones by pyrolysis–gas chromatography/mass spectrometry, 135
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153
A new pyrolyzer for laser pyrolysis–gas chromatography/ mass spectrometry experiments, 165
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229
GC/MS
Thermolytic decomposition of coniferyl alcohol, 195
Glycated proteins
A new pyrolyzer for laser pyrolysis–gas chromatography/mass spectrometry experiments, 165
Glycerol ether lipids
A study of chemical transformation of glyc-

erol ether lipids to hydrocarbons by flash and hydrous pyrolysis, 121

Hydraulic fluids
Evaluation of the thermal decomposition apparatus used for toxicity testing of hydraulic fluids, 43
Hydrocarbons
A study of chemical transformation of glycerol ether lipids to hydrocarbons by flash and hydrous pyrolysis, 121
Low-temperature matrix-isolation infrared spectroscopy — a method to characterize reactive species from low-pressure pyrolysis of hydrocarbons for mechanistic elucidations, 265
Hydrous pyrolysis
A study of chemical transformation of glycerol ether lipids to hydrocarbons by flash and hydrous pyrolysis, 121

Imidodiphosphate
Pyrolysis of tetraphenyl imidodiphosphate, 217
In situ FT-IR
Kinetics of the –C≡N bond transformation into the conjugated >C=N– bond in acrylonitrile copolymer using in situ Fourier transform-infrared spectroscopy, 87
Infrared emission spectroscopy
Studies of thermal transformations of fulvic acids using Fourier transform-infrared emission spectroscopy, 73
Interpretation procedure
A method for the interpretation of pyrolysis–mass spectra of polyamides, 15
IR spectroscopy
Low-temperature matrix-isolation infrared spectroscopy — a method to characterize reactive species from low-pressure pyrolysis of hydrocarbons for mechanistic elucidations, 265

Kinetic studies
Kinetic studies of the primary pyrolysis of municipal solid waste in a Pyroprobe 1000, 99
Kinetics
Kinetics of the –C≡N bond transformation into the conjugated >C=N– bond in acrylonitrile copolymer using in situ Fourier transform-infrared spectroscopy, 87

Lignin
Thermolytic decomposition of coniferyl alcohol, 195

Mass spectrometry
Direct analysis of bacterial glycerides by Curie-point pyrolysis–mass spectrometry, 1
A method for the interpretation of pyrolysis–mass spectra of polyamides, 15
Composition and microstructure of butadiene–isoprene copolymers from pyrolysis–gas chromatographic/mass spectrometric data, 33
Analysis of 2,6-diaryl-3,7-dioxabicyclo-[3.3.0]octanes and dibenzylbutyrolactones by pyrolysis–gas chromatography/mass spectrometry, 135
A new pyrolyzer for laser pyrolysis–gas chromatography/mass spectrometry experiments, 165
Pyrolysis of tetraphenyl imidodiphosphate, 217
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229
Matrix isolation
Low-temperature matrix-isolation infrared spectroscopy — a method to characterize reactive species from low-pressure pyrolysis of hydrocarbons for mechanistic elucidations, 265
Melanins
A new pyrolyzer for laser pyrolysis–gas chromatography/mass spectrometry experiments, 165
Metal exchange
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153
Municipal solid waste
Kinetic studies of the primary pyrolysis of municipal solid waste in a Pyroprobe 1000, 99

Nickel(II) complexes
Spectral and thermal studies on nickel(II) complexes of acenaphthaquinonemono(4-methylquinolinyl)hydrazone, 63

Polyamides
A method for the interpretation of pyrolysis–mass spectra of polyamides, 15
Polyimide
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229
Proof and characterization of radicals
Low-temperature matrix-isolation infrared

spectroscopy — a method to characterize reactive species from low-pressure pyrolysis of hydrocarbons for mechanistic elucidations, 265

Quantitative analysis
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153

Saccharides
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153

Selected ion monitoring
Composition and microstructure of butadiene–isoprene copolymers from pyrolysis–gas chromatographic/mass spectrometric data, 33

Shrinkage
Dilatometry of wood. Part I. Longitudinal dilatometry of wood untreated and treated with ammonium phosphate, 175

Sodium borate
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245

Sodium chloride
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245

Sulfite pulps
Quantitative analysis of the major saccharides in sulfite-treated wood pulps by pyrolysis–gas chromatography: the effect of metal ions, 153

Thermal decomposition
Evaluation of the thermal decomposition apparatus used for toxicity testing of hydraulic fluids, 43
Pyrolysis of tetraphenyl imidodiphosphate, 217
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229

Thermogravimetry
Thermal decomposition of aryl–alicyclic polyimides studied by thermogravimetry/mass spectrometry and pyrolysis–gas chromatography/mass spectrometry, 229

Thermolysis
Thermolysis of some thioether derivatives, 57

Thermolytic decomposition
Thermolytic decomposition of coniferyl alcohol, 195

Thioether derivatives
Thermolysis of some thioether derivatives, 57

Toxicity
Evaluation of the thermal decomposition apparatus used for toxicity testing of hydraulic fluids, 43

Wood
Dilatometry of wood. Part I. Longitudinal dilatometry of wood untreated and treated with ammonium phosphate, 175
Dilatometry of wood. Part II. Longitudinal dilatometry of wood treated with sodium borate, ammonium bromide, and sodium chloride, 245
